Afwerkingstukken

<p>Verlenging druiplijst</p>  A vertical, L-shaped metal profile with a flat top surface and a vertical side flange.	<p>Druiplijst</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for water runoff.
<p>Gootslab</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for gutter installation.	<p>Interne windveer Sinus</p>  A metal profile with a corrugated top surface and a vertical side flange.
<p>Versterkte windveer</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for reinforcement.	<p>Verlenging windveer</p>  A vertical, L-shaped metal profile with a flat top surface and a vertical side flange.
<p>Kilgoot</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for gutter installation.	<p>Interne windveer</p>  A metal profile with a wide, flat top surface and a vertical side flange.
<p>Nokplaat tegen muur</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for roof edge protection.	<p>Ronde nokplaat</p>  A metal profile with a curved top surface and a vertical side flange.
<p>Sneeuwstopper</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for snow protection.	<p>Sneeuwstopper Omega</p>  A metal profile with a wide, flat top surface and a vertical side flange, designed for snow protection.

Benodigde gereedschappen

<p>Blikschaar</p> 	<p>Plooitang</p> 
<p>Meter</p> 	<p>Hamer</p> 
<p>Afstandhouder (Fig. 1)</p> 	<p>Schroefmachine</p> 

De afstandhouder is een gereedschap om gemakkelijk de nodige afstand (350mm) te behouden tussen het latwerk.

Fig. 1

Het is verboden om de platen te snijden met een (haakse) slijper of ander gereedschap dat voor plaatselijke verhitting van het plaatwerk zorgt. Bij gebruik hiervan vervalt automatisch uw garantie op het product
